

# Resume

Keisuke Aiko

---

## Profile

Hello, my name is Keisuke Aiko. I have been working in the retail industry for 18 years as a sales floor manager and supervisor, and I am taking on the challenge of developing software that supports a society where animals and people can live together in harmony, while using my knowledge gained in the pet and gardening field.

CS learning is ongoing with the online learning site Recursion.

---

## About Me

- 🛍️ **From Retail to IT:** Decided to become a software engineer to update long-standing practices and systems.
- 📅 **Passion for pets & gardening:** Goal is to help people, animals and plants live better lives.
- 🧑 **Diverse interests:** Explores everything from CS and English conversation to the outdoors.

**Fun fact:** I like to reverse engineer and structure processes around us, from pet store logistics to smart home setup.

---

## Skills

### Languages & Tools

- Python, JavaScript, HTML, CSS, Git, Docker

### Frameworks & Libraries

- React (useState, useEffect), Bootstrap, Tailwind CSS

### Concepts

- OOP, data structures, recursion, software testing, SQL, OS/architecture fundamentals
- 

## Experience

Retail Floor Manager / Supervisor

18 years of experience in store operations, team management, and business improvement. Utilized knowledge of pet and garden sales floor to design services.

---

## Currently Learning

- **Computer Networking:** Socket-based client/server, 5-layer model, custom RPC chat
  - **API Practice:** Book Search App leveraging Promise and JSON (title/ISBN search)
-
